**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5, 6, (9) and 10-13, drawn to a multimodal polyethylene molding composition, classified in class 525, subclasses 191 and 240.
- II. Claims 7 and 8, drawn to a method of producing a multimodal polyethylene molding composition, classified in class 525, subclass 193.
- III. Claims 14 and 15, drawn to an article of manufacture, classified in class 425, subclasses 522+.
- IV. Claim 16, drawn to a process of extrusion, classified in class 264, subclasses vary.

The inventions are distinct, each from the other because:

Inventions of Group I and of Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by an other and materially different process such as sequential polymerization.

Inventions of Group II and of Group IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to processes

Art Unit: 1711

that manufacture products different in scope. The Group II claims produce a resin blend; the Group IV claims produce an article.

### ***Allowable Subject Matter***

Claims 5 and 10-13 are allowed.

No prior art has been found that either teaches or fairly suggests the production of a polyethylene molding composition comprising (A) from 30 to 60% by weight of low-molecular weight ethylene homopolymer, (B) from 30 to 65% by weight of high-molecular-weight polyethylene copolymer, and (C) from 1 to 30% by weight of ultrahigh-molecular-weight ethylene homopolymer or copolymer, each having the characteristics as herein claimed.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites a product that is defined by properties desired for that product, that being "excellent convertibility into hollow articles. This language does not serve to define the invention. As such, the claim is deemed to be vague and confusing.

Art Unit: 1711

Claim 9 depends from claim 15. This renders the claim as vague. The claim appears to be proper to depend from claim 5.
